Dear Ms. Hutchinson:

This letter is regarding the work performed by Hutchinson International for Viacom Outdoor Sports Marketing at the University of Maryland, College Park – Comcast Center. Your on-site crew, led by Robert Jackson, with the assistance of Skip and Clarence, is to be commended for their professionalism, work ethic, and overall “can-do” attitude. Your crew was responsible for the fabrication of the center hung scoreboard frame, installation of the center hung scoreboard hoisting apparatus, and installation of all the scoreboard and LED video displays within the Comcast Center. It is important to note that these display components have a value of approximately \$1,380,000.00; require tight installation tolerances; and are very fragile. Your crew worked at a very steady pace, was able to adapt quickly to unforeseen circumstance as they arose, without loss of time, and provided a fabricated and installed system well within the tolerances required by Viacom Outdoor Sports Marketing. The crew was also very personable and enjoyable to work with.

Should Viacom Outdoor Sports Marketing have future work in the Washington area, Hutchinson International can expect a call. We will also be requesting Robert and his crew for the on-site work.

Respectfully yours,

John Schlaefer  
Project Manager  
Viacom Outdoor Sports Marketing
